

IP Licensing Opportunity

ezVue™

Inventor Objective: Seeking Licensees and Investors
IP Status: Provisional Patent Application AU2008900932
Development Stage: Working prototype available

The ezVue™ is an innovative storage system designed to capitalise on limited space by creating multiple shelves within a single drawer. A unique patented hinge system allows the front section of the drawer to drop down when pulled out. This provides increased storage and greater view and access to the drawer's contents.

ezVue™ offers a variety of features and benefits and could be adapted to suit a wide range of applications and industries. As an effective storage and organisation device, the ezVue™ could be tailored to suit the office, home, caravan, boat or anywhere space is limited. Depending on the application, the product could be easily customised to house a variety of items for example, office records, CD/DVDs or food products.

An opportunity currently exists for potential investors or licensees to become involved with the ezVue™. The inventor is seeking investors or potential licensees to deliver the product to market.

*See ezVue™ on ABC's ['The New Inventors'](#).
